Meet the Team

Robin Huish
Managing Director & Reserve Trainer
Robin is the Managing Director of Hickleys and another long serving member of staff having served 39 years. Starting off in our workshops as an apprentice Auto electrician, he then rose through the management structure to his current position as a director of the company. Various divisions of the company come within his control including our Electrical & Diesel Workshops, Garage Equipment, Diagnostics and the Training Academy, he also spends much of his time researching the best suppliers and products for Hickleys to represent in the UK market.
Robin also acts as a reserve trainer for the academy, having years of knowledge and experience in auto electrics and more recently the technical aspects of the auto locksmith market, such as key programming & transponder technologies. He is able to train various subjects within our range of courses.

Bosch
Bosch use a range of specialists to deliver their training, depending on the subject matter and complexity of the course content. Whether they use their own staff or an industry specialist in that product area, you can always be assured of consistently high quality training delivered in a structured manner that enhances learning to give you the very best skills.
Introduction

Hickleys Training Academy

Since 1925 Hickleys have been offering solutions to the automotive motor trade throughout the UK. Our Auto service center still specialises in electrics and diagnostics as well as traditional mechanical repairs. Growing out of a need for greater diagnostic ability in our own workshops our diagnostic division was born in the early eighties, now the largest part of our company, the diagnostic division represents products from all over the world. Our diagnostic business is built on added benefit where our product specialists and technical sales specialists offer product, technical and software support. With the introduction of immobilisers in vehicles our specialism in Auto Locksmithing began and we are now the leading supplier of auto locksmith products in the UK representing all the leading equipment. Again we offer in-depth technical and product support along with the full range of support products.

As a part of the added support we offer to the products we represent customer training has become an essential part of our portfolio and this lead to the opening of the Hickleys Training Academy. The Hickleys training academy is the leading center in the UK for Auto Locksmith training covering everything from one day product or vehicle specific courses to courses run over multiple days allowing students to learn and qualify for a new trade. Further expansion has now enabled us to offer a range of traditional locksmith training including lock picking, safe opening and other specialist courses.

NCFE Approved

The quality and relevance of the training delivered by the Hickleys Training Academy is assured, because we are one of only a few accredited centres approved by the NCFE to deliver training with recognized courses/programmes to level 2, 3 or level 4.

Achieving NCFE approval ensures our quality of customer service and training standards are maintained through constant review, self assessment, student feedback and market development. With these disciplines in place you can be sure of receiving the very best, consistent and relevant training available.

ELCAS Approved Provider

Hickleys Automotive Academy is an ELCAS approved training centre and an Enhanced Learning Credits Provider and caters for Armed forces personnel wanting to gain a higher level of learning or considering resettlement.

If you’re a member of the Armed Forces, you can access funding from the MOD’s Enhanced Learning Credits Scheme (ELC). This scheme is designed to promote Lifelong Learning within the Armed Forces for the pursuit of higher level learning and for courses that result in a nationally recognised qualification at Level three or above on the National Qualifications Framework (NQF) (England and Wales), a Level six or above on the Scottish Credit and Qualifications Framework (SCQF).

As a Preferred Supplier to the MOD we offer tailored courses to suit every individual’s requirements and using our extensive knowledge of the resettlement process ensure that the service leaver gets the maximum possible training benefit from their course with us.

www.hickleystrainingacademy.com  tel. 01823 328500  training@hickleys.com
Locksmith Training

The Hickleys training academy is fortunate in having exceptional trainers with impressive credentials running our training courses. Our trainers are not employed by Hickleys and whilst not training, are practising their trade as a professional locksmith & auto locksmith. This means they keep their skills honed to the market, relevant to today’s locks and most importantly independent from Hickleys.

Jason Hillier, who runs our domestic & commercial locksmith training and safe opening courses is an extremely well known professional locksmith with years of experience and holds amazing lock picking skills, Jason is truly one of the guys that can just defy belief with his abilities in opening all types of locks including safes.

Jason has been training and passing on his skills for many years as the leading trainer for a Midlands based training school where he has trained hundreds of people the skills needed to prosper as a locksmith, in addition Jason is in great demand to train the security services, military and government representatives.

One of the most important skills of the professional locksmiths is the ability to open all types of locks in a non-destructive way using your locksmithing skills to pick and decode locks without using forcing techniques. With all of our courses students will be taught the correct way to pick locks often receiving training on more than one method on each lock type.

The foundation courses include all the fundamentals of a professional locksmith including:
- Stripping and rebuilding all types of locks
- Making keys to different locks
- Picking rim, euro’s, padlocks & garage doors
- Picking all types of mortice locks
- Dealing with UPVC failed mechanism
- Last resort destructive methods

Specialist courses
We offer a range of training courses to meet the needs of all types of students either with no previous learning and wanting to start out in a new industry or where existing locksmiths want to add to their skills. We also offer a range of specialist training courses designed to build on your current skills and enable you to expand your company abilities, courses such as Multilock picking and additional van security are just a few.

Safe opening
One of the natural extensions to the locksmith trade is to expand into safe opening, no previous knowledge is required and you will learn to pick open most of the common safes used today, in addition within our training course we use and recommend 2 in 1 picks which enables us to keep the cost of tools required to a minimum.

Tools & equipment
An additional benefit of attending the 5 or 8 day locksmith training course at the Hickleys training academy is that you will be given a tool box and range of tools and picks essential to get your business up and running. In addition the trainer will discuss a range of low cost or self made tools that you can add to your collection instead of buying expensive branded picking tools.
Hickleys Training Academy

Auto Locksmith Training

The Hickleys Training Academy Auto Locksmith Training has a great pedigree, originating from the very 1st trainer in Auto locksmithing, Mike Byham.

Mike of MB Locks built up a reputation as an established auto locksmith and is renowned in the industry as the “trainer that trained the trainers”. Together with our considerable knowledge and expertise in the auto locksmith trade this has allowed us to develop training programmes which still use the fundamentals of Mike’s teaching style and ethics.

Hickleys acquired the MB Lock business in 2010, and continuing on in the same tradition, one of Mike’s students Andy Marshall Brown is our lead trainer. Andy is still a practising Auto locksmith with an impressive reputation in the market for knowledge in the latest vehicle key programming methods and has an excellent understanding of vehicle programming electronics.

We offer courses for all levels of candidates from students with no previous experience to experienced Auto Locksmiths wanting to learn new skills and advancements in the market using the latest diagnostic equipment.

We offer a range of courses covering the following skills:

- Auto Locksmith foundation training
- Key & remote programming skills
- Understanding transponders and key cloning
- Eeprom and microprocessor programming
- Non destructive vehicle opening skills
- Impressioning keys fro cylinder, lazer and tibbe keys.

Those taking our courses will be taught professional techniques and the ethics of our industry. We believe that by adhering to this strict code of ethics you will retain your customers and obtain further business built on your reputation.

Enforcement Training

Hickleys Ltd also provide an advanced technical training course to selected Law Enforcement and Governmental agencies. Our courses have all been designed to dovetail into existing “in house” training courses and build on your current learning to enable the client to carry out highly technical procedures. We will provide the learner with not only the technical skills required to get the job done but also the practical ability.

To find out more about the enforcement syllabus, dates and prerequisites please contact Nicky Summers.

Those taking our courses will be taught professional techniques and the ethics of our industry. We believe that by adhering to this strict code of ethics you will retain your customers and obtain further business built on your reputation.

Hickleys Training Academy

Vehicle Diagnostics

The Hickleys Training Academy can offer a varied range of training courses to meet the demands of modern vehicles diagnostics and technical repair procedures.

As leading specialist in auto electrics and diesel fuel injection, Hickleys are ideally suited to deliver technically advanced training programs to suit all levels of learning requirements from foundation level through to experienced master technician level.

The courses offered cover all disciplines within the motor trade and cover the following areas:

**Information training courses** offering an overview on a particular feature of modern vehicles such as Canbus, Hybrid, Common Rail diesel and air conditioning. These courses are ideal for anyone needing to have a good understanding of the systems, how they work, the components involved, the safety implications and the methods of repair.

**Product user training courses** are designed to enable customers to maximize their understanding of a recently purchased diagnostic or test equipment. The courses cover operation of the equipment, the methods of testing, the software applications, special procedures required and any safety precautions or legal requirements.

**System training courses** offer general system testing to expand and develop the students level of learning. These training courses build on previous learning in a structured program of training courses. Starting with basic electrics then building through to Diagnostic, Diesel and Master technician. The courses cover areas such as Sensors & Components, engine management, safety restraints, braking & ABS, oscilloscopes and advanced electronics together with diesel courses such as Common Rail, solenoid systems and unit injectors systems.

We can offer the Bosch learning program of Diagnostic Technician, Diesel Technician and Master Technician, which offer IMI approved training culminating in an ATA qualification and Bosch Master Technician. This training will be organised by us and delivered at different learning centre’s around the country.

Hickleys Training Academy

The Training Facilities

The Hickleys Training Academy is a purpose built and nationally approved training centre offering locksmiths, auto locksmiths and motor trade technicians the ability to enhance their skills, increase their learning and attain the qualifications required to operate successfully in these complex industries.

The training facilities are situated at our head office in Taunton, Somerset and offers a state of the art learning experience. The dedicated training suite offers a modern and comfortable environment with an air conditioned climate, computerised visual display equipment, modern workshop facilities and is fully equipped with the latest equipment in the market.

Vehicle Training Garage

The Hickleys Training Academy continues to expand at a rapid rate and we now have a dedicated 1000 sq ft vehicle training garage within the training centre, this dedicated garage is equipped with the latest training vehicles and equipment to enable students to learn the latest techniques in the very best environment.

Specialist Equipment Supplier

The Hickleys Training Academy benefits from the market leading position that Hickleys holds within the Locksmith & Auto Locksmith and Diagnostic equipment industry.

As the UK’s leading independent specialists we are distributors for most of the leading brands, including Advanced Diagnostics, Zed-Full, Bosch, Silca, Brain Bee, Delphi, Smokepro, Pico, Dec and many more plus a growing range of locksmith tools.

Our highly skilled team of specialists offer a high level of technical and product support to the industry and this feeds through into benefits for the training academy.

Specialist Training

Our training centre offers market leading training for three market sectors; Locksmithing, Auto Locksmithing and Vehicle Diagnostics.

Locksmithing is a niche market with high levels of technical content and good rewards are possible when the correct skills are achieved. Our Locksmith training program offers top quality training to both the domestic & commercial locksmith industry including non destructive picking, safe opening and a range of more specialist skills.

Auto Locksmithing is a niche sector of both the Automotive and locksmith industry and offers excellent rewards with limited competition; the abilities required are both mechanical and electronic with a high degree of training and skill required. Auto Locksmithing is an ideal extension to service for both domestic locksmiths and motor trade garages.

Our Vehicle diagnostics programme covers a wide range of vehicle technologies including Engine management, Common rail diesel, Can bus electrics, Hybrid systems, Air conditioning as well as user courses on specific diagnostic test equipment.
More Than Just a Course

When deciding to train as an Auto Locksmith there is much more to consider than how quickly and cheaply it can be achieved. You need to ensure the training you receive is first class and from a qualified and approved training centre, that you get the best advice on the equipment to purchase and that you receive long term support whilst building your business.

Enrolling in an Auto Locksmith course with us offers you much more than just a training course. Hickleys are renowned as the leaders in the Auto Locksmith industry and completing our training courses gets you access to our team of product specialists, our technical support package and the best market leading products money can buy.

Choosing to invest in us for your training and equipment means in return we invest in you.

The Benefits:
- Nationally accredited and revered training courses
- Approvals from all leading industry bodies
- Fully equipped training centre with the latest equipment
- Distributors of all the market leading brands
- In-depth team of product specialists keeping you up to date
- Technical support team offering help and advise over the phone
- Technical support forums, training videos, information books
- And much much more……..

What the Customers Say

On every training course students complete a review/feedback form. We have successfully trained over 1800 students and this is what they rate their satisfaction:

Course Contents 95%
Training Facilities 98%
Handouts 95%
Course Structure 99%
Practical Learning 97%
Refreshments 95%

I recently attended one of your 5 day Auto Locksmith training courses at your Training Academy in Taunton.

I would like to take this opportunity to thank you and all your staff for all the "extra" help, patience, skills and knowledge passed to me throughout the week, from the first cup of tea (and choccy biscuits) by Nicky on the Monday morning to the "Call me if you get stuck" closing statement from Andy on the Friday afternoon, the whole week has given me the confidence and skills learnt to further my business.

The course content was well established and clearly structured. The handouts, folders and slideshows were very well designed, clear and simple to follow. The trainers, especially Andy, showed patience and gave us extra one-to-one help if he saw any of us struggling.

The new training rooms are fully equipped with all the latest equipment, probably because they sell much of the equipment a locksmith would need.

I would have no hesitation in recommending Hickleys Training Academy to anyone wanting to set up their own business or further adding to their business of Auto Locksmithing.

Robert Carney (Carney's Home Securities)

Recently I attended your 5 day beginner's Auto Locksmith course. This has given me the knowledge and confidence to pursue my career.

The facilities at the training academy were excellent and the staff were very professional. The lessons, slideshows, practical examples and folders provided were all very informative and easy to follow. The staff were very helpful and generous with their time in explaining everything. The training room was very well equipped with the latest technology. I was also very pleased to be able to purchase most of the equipment I would need from the company.

I would highly recommend the Training Academy at Hickleys to anyone thinking of becoming a locksmith or wishing to update the training of their staff.

Danny Mann (Mann Locksmiths)

I would like to take this opportunity to thank Hickleys Ltd for the time, effort and valuable expertise in the 2 day training course (Vehicle Key programming - MVPPro and Transponder Training - Zed-Bull) that I attended on the 5th and 6th March 2012.

Having attended various civilian training courses throughout my 14 year career in the Royal Air Force on a variety of subjects, some were worthwhile and some were not! So when I arrived at Hickleys Training Centre I was open minded to how the course would be instructed and to what the course syllabus would actually contain. By the end of my second day of the course it was clear to me just why Hickleys are industry leaders in this specialist field.

The purpose built student training environment was first rate. As was the course syllabus, which covered a full spectrum of related topics during the two days training, which was instructed by highly knowledgeable and experienced professionals.

It's reassuring to me as a serving member of Her Majesty's Royal Air Force and soon to be civilian, that there are civilian companies and dedicated individuals such as Hickleys Ltd that are paving the way forward in support of military personnel. I am making the transition from the military environment into the civilian employment sector. I would have no hesitation in recommending to my peers within the military community and civilians alike, that Hickleys Ltd are their first point of contact for acquiring new skills within the automotive industry and for the procurement of cutting edge automotive equipment.

5 Day Intermediate Safe Opening Course

Duration: 5 Days (9am - 5pm)
Course Code: IIQ3713
NCFE Level: 3
Price: £1500.00 + VAT

Course Details
This foundation course is designed to introduce delegates with little or no previous experience and practising locksmiths into the Safe Locksmith world, which will ensure each delegate will learn how to pick open the most used locks today. Our students will understand the workings of the lock and therefore how to open them when no keys are available. All the methods that are shown are using 2 in 1 picks to keep the cost down for the individual and purely learning on skill set. We aim to provide you with the solid grounding you need to start and run your locksmith business correctly from day one. The course offers intensive training over a 5 day period with a maximum of 5 students per course. The course is 90% practical to ensure you know how to put the theory into practice. Upon completion of the course you will have the ability to start practicing as a knowledgeable locksmith and have an in-depth ability to work on the locks trained on. You will also receive a detailed instruction manual and training certificate.

Course Content
We offer a range of courses covering the following skills:
- Stripping down 7 lever post office locks and picking using 2in1 picks and decoders
- Picking alpha / CQ safes with homemade tools on the course
- Picking Carl Witkopp (CAWI) locks 8 lever and the same technique applies to 1 levers of the same make
- Mauer President - 71111 using again 2 in1 picks plus decoder
- STUV picking this 8 lever lock same applies to 9 and 11 levers of the same make

Within the training course you will have the chance to see and use the very latest state of the art tools available to modern safe engineers.

Who should attend
It is ideal for new employees and armed services personnel not currently involved in the locksmith industry or people looking for a career change or an add on to your existing locksmith business where you want to operate in a niche market with a high level of technical content and good rewards.

5 Day Auto Locksmith Training

Duration: 5 Days (9am - 5pm)
Course Code: IIQ2031
NCFE Level: 3
Price: £1250.00 + VAT

Course Details
This foundation course is designed to teach candidates with little or no previous experience how to strip, service and reassemble all types of locks fitted to modern motor vehicles.

Our students will understand the workings of the lock and therefore how to open them when no keys are available. They will be taught how to cut and decode keys, learn about diagnostics & transponders and experience first hand the latest equipment and technology available. We aim to provide you with the solid grounding you need to start and run your locksmith business correctly from day one.

The course offers intensive training over a 5 day period with a maximum of 6 students per course. The course is 90% practical to ensure you know how to put the theory into practice.

Upon completion of the course you will have the ability to start practicing as a knowledgeable Auto locksmith and have an in-depth ability to work on the vehicles trained on. You will also receive a detailed instruction manual and training certificate.

Course Content
- Strip and understand the characteristics and rebuild a range of vehicle locks
- Recognise lock faults, repair and service effectively
- Effective entry of vehicles without causing damage
- Lock picking and decoding both cylinder and laser locks
- Key cutting, both duplication and to code
- How to find key code locations and vehicle information
- An overview of immobiliser systems, transponders and diagnostics
- Demonstration and practical experience on modern vehicles
- Essential business planning including what to ask when the phone rings
- Relevant paperwork requirements including pricing structures and invoicing
- Tool requirements and how to set up your service van

Locking systems fitted to Ford, Vauxhall, Rover, Peugeot, Renault and VAG vehicles will be covered in great detail and other systems within the given time frame.

Within the training course you will have the chance to see and use the very latest state of the art equipment available to the modern Auto Locksmith, including key programming, cloning and eeproming equipment. Additional training on Key & remote programming, transponder cloning and eeprom programming are suggested to complete your training program to become a complete Auto Locksmith.

Who should attend
The Auto locksmiths foundation course is a popular course suitable for those with little or no experience in the Auto Locksmith trade. It is ideal for current locksmiths not involved in the Auto market, Motor trade operations that want to offer Auto locksmith services and people looking for a career change into a niche market with a high level of technical content and good rewards.

8 Day Auto Locksmith Training

Duration: 8 Days (9am - 5pm)
5 consecutive days plus 3 single day courses to be taken when required
Course Code: IIQ2032
NCFE Level: 3
Price: £1750.00 + VAT

Course Details

The Auto locksmiths 8 day beginner’s course is a way of attending an all-encompassing course in a flexible way. The course is designed so the candidate can attend the foundation 5 day course and then complete the 3 days of specialist training as and when dates suit best.

Again this course is suitable for those with little or no experience in the auto locksmith trade and offers in depth training in both the mechanical and electronic parts of the market. This course is designed to teach candidates with little or no previous experience how to strip, service and reassemble all types of locks fitted to modern motor vehicles.

Our students will understand the workings of the lock and therefore how to open them when no keys are available. They will be taught how to cut and decode keys, learn how to use diagnostics & transponder programming and cloning machines, as well as how to carry out eeprom programming.

Again the course is 90% practical to ensure you know how to put the theory into practice. Upon completion of the course you will have the ability to start practicing as a knowledgeable Auto locksmith and have an in-depth ability to work on the vehicles trained on. You will also receive a detailed instruction manual and training certificate.

Course Content

- Strip and understand the characteristics and rebuild a range of vehicle locks
- Recognise lock faults, repair and service effectively
- Effective entry of vehicles without causing damage
- Lock picking and decoding both cylinder and laser locks
- Key cutting, both duplication and to code
- How to find key code locations and vehicle information
- An overview of immobiliser systems, transponders and diagnostics
- Demonstration and practical experience on modern vehicles
- Essential business planning including what to ask when the phone rings
- Relevant paperwork requirements including pricing structures and invoicing
- Tool requirements and how to set up your service van
- Additional day - Key & remote programming skills
- Additional day - Understanding transponders and key cloning
- Additional day - Eeprom and microprocessor programming

Locking systems fitted to Ford, Vauxhall, Rover, Peugeot, Renault and VAG vehicles will be covered in great detail and other systems within the given time frame.

Within the training course you will have the chance to see and use the very latest state of the art equipment available to the modern Auto Locksmith, including key programming, cloning and eeproming equipment, as well as the Mr Li range of lock picks.

Who should attend

Again the course is ideal for locksmiths not involved in the auto market, motor trade operations that want to offer auto locksmith services and people looking for a career change into a niche market with a high level of technical content and good rewards.

The 8 day course offers the same syllabus as the 5 day course but also includes three of the single day training courses; namely, Key & Remote Programming, Understanding Transponders and Eeproming Procedures. This course can be taken as 8 continuous days or alternatively the 3 additional days can be held over for a later date. It is ideal for candidates that are currently employed and therefore need flexibility on the training dates.

- Demonstration and practical experience on modern vehicles
- Essential business planning including what to ask when the phone rings
- Relevant paperwork requirements including pricing structures and invoicing
- Tool requirements and how to set up your service van
- Key & remote programming skills using the AD100Pro / MVPPro / Zed-FULL
- Pincode reading procedures, methods and options
- Understanding transponders, fixed, Crypto and Precoded using Zed-FULL
- Key cloning procedures, methods benefits and usages.
- Completion of various vehicle scenarios
- An overview of eeprom techniques.

Locking systems fitted to Ford, Vauxhall, Rover, Peugeot, Renault and VAG vehicles will be covered in great detail and other systems within the given time frame.

Within the training course you will have in depth training on the very latest state of the art equipment available to the modern Auto Locksmith, including key programming, cloning and eeproming equipment, as well as the Mr Li range of lock picks.

Who should attend

This course is ideal for candidates that can be away from the business for a 2 week period or candidates that are looking for a career change. Again the course is ideal for locksmiths not involved in the auto market, motor trade operations that want to offer auto locksmith services and people looking for a career change into a niche market with a high level of technical content and good rewards. This training course is very popular with military personnel looking for a civilian life business opportunity.

An ideal training course for someone wanting to start out in this trade with an exception level of training giving you the best start possible.

Accreditation

NCFE accredited level 3
5 Day Advanced Auto Locksmith training

Course Details

An ideal course for those students who have completed the two-week Beginner to Intermediate Auto Locksmith Course and now wish to acquire detailed instruction on the popular but demanding systems from VAG, Mercedes, BMW, Fiat and Toyota/Lexus.

Key programming on these vehicles present complex issues and can leave many wary to attempt to tackle them, however the financial rewards make them an excellent addition to your services.

This course will provide the detailed knowledge needed to successfully complete these types of jobs.

The theory is delivered in the familiar format intermixed with plenty of hands on training opportunities on both components and live vehicles.

Course Content

Soldering Techniques: Instruction in the techniques required to carry out everything from repairs to remote controls to removing and re-instating EEPROM and Processor Chips along with methods of reading in-circuit by “pinning out” using a re-work station.

VAG Vehicle Key Programming: A detailed look at all the immobiliser systems that have been used on VAG vehicles since 1995 to current day, from System 1 to UDS plus Pin code reading via OBD and EEPROM, key programming, Pre-coding of transponders, Remote programming and use of Key DIY for remote generation, Audi Smart Key Emulators.

Cloning of keys using RW4 Plus M Box and Handy Baby Applications.

Picking of HU66 and HU162 Locks Demonstrated.

Mercedes and BMW Key Programming: BMW EWS and CAS Key Programming using the latest techniques available from Zedfull using both EEPROM Reading and OBD.

Generate BMW EWS Keys with Key DIY and Generation and Cloning of CAS Slot Keys.

Mercedes Key Generation from EIS Data for vehicles 1998-2015/16.

Covering infra-red applications from Motorola and BGA Systems using Snoops, “pin out” in circuit reading and OBD.

Picking and decoding of HU92 and HU64 Demonstrated.

Fiat and Toyota/Lexus Key Programming: A detailed look at all systems used by Fiat from Code 1 to Code 3 1995-2014.

Cloning or transponders and Emulator generation.

Pin code reading, pre-coding of transponders and remotes via EEPROM Reading and OBD.

Transponder generation and writing direct to Bin File on Toyota Vehicles using Jadoogar Software and EEPROM reading and writing for 4C, 4D and Smart Key Systems.

Cloning options from Handy Baby and Silica.

Key & Remote Repair Service

Duration : 1/2 Day (9am - 12.30pm)
Course Code : IIQ3705
NCFE Level : 2
Price : £150.00 + VAT

Course Details
Offering a service to repair and refurbish vehicle remotes can add an additional service and valuable income to your current business. Car remotes are very expensive and often fail for simple reasons such as broken casing, worn rubbers, failed switches or just a flat battery.

The Key and Remote Repair Service package offers everything required to start a comprehensive repair and refurbish service

Course Content
• Electrical testing training, voltage reading and continuity testing
• Remote disassemble and rebuilding methods
• Battery testing and replacement
• Battery Desoldering & Soldering skills
• Circuit board testing and switch replacement
• Remote synchronising methods and manual programming

Who should attend
This course is ideal for key cutting shops, garages and locksmiths that want to offer a repair service for vehicle keys and remotes. Whether you currently offer vehicle key cloning, key programming or neither, offering repairs to car keys and remotes can be lucrative to your business and an ideal addition to your current service

Key & Remote Repair Kit
Buy a complete repair solution including the training at an extra special price. The repair kit includes a comprehensive tool kit to carry out the stripping, test and repair of the majority of remotes.

Included in the kit is a starter pack of batteries, remote shells, buttons, switches and key blades to cover a huge range of vehicle remotes.

Repair Parts
Range of remote batteries, 200 batteries 20 different types
Selection of remote shells, 1 of each of 28 different cases
Selection of remote rubber buttons, 4 of each of 11 different rubbers
Selection of remote switches, 5 of each of 11 different switches
KB360E blade kit, 2 of each of 36 assorted blades
KB361E Horseshoe key kit, 2 of each of 12 assorted blades

Total Package Value: £886.34 + VAT

Tooling
Continuity / voltage tester
IR & Radio frequency Remote tester
Remote key vice
15w Soldering iron
Soldering workstation & magnifier
Soldering mat
Solder, braid & flux off accessories
Jewellery screwdriver set
Tweezers

Special Package Price : £795.00 + VAT

**Book together with Key Cloning Silca RW4+ & ID48 (following page)
As this course meets the needs of the key cutting shops, cobbler shops, ironmongers and other shops that often get the opportunity to offer key & remote service, this course runs on the same day and if booked together will be discounted by £25.00

Key Cloning Silca RW4+ & ID48

Duration: 1/2 Day (1.30pm - 5pm)
Course Code: IIQ3706
NCFE Level: 2
Price: £150.00 + VAT (£125.00 + vat if booked with Remote repair course)

Course Details

As an alternative to key programming, many vehicle keys can be cloned with a transponder duplicating machine. This enables existing keys to be duplicated without the need of complicated programming. This course uses the market leading Silca RW4+ transponder machine to carry out many types of cloning. In recent years the ability to clone Phillips ID46 and Megamos ID48 transponders has increased the volume of keys that can be cloned, however these procedures require both the existing working key and the vehicle to complete the operation. Cloning a key offers a quick and less complicated service to offer customers additional keys and can also offer a solution to key programmers wanting to supply a remote key but where programming is not possible.

Course Content

- Transponder identification
- Transponder fixed code writing
- Fixed transponder cloning
- Texas transponder cloning
- Phillips crypto transponder cloning
- Phillips ID46 cloning using snoop module
- Megamos ID48 cloning using Internet, M box & M snoop
- Cloning transponder types
- Manual remote programming procedures
- Keydiy & ID48 cloning together
- PC software, database & loading software
- Linking RW4+ to MVPPro/AD100Pro for Fiat precoding

Who should attend

Attending the course will give an in-depth understanding of cloning using the Silca RW4+. Therefore this course best suits candidates that own or intend to own an RW4+ and want to understand the cloning opportunities with the equipment. Ideal for companies that want to offer an “additional key” solution or wants to add cloning to their current services.

**Book together with Key & Remote Repair Service (previous page)**

As this course meets the needs of the key cutting shops, cobbler shops, ironmongers and other shops that often get the opportunity to offer key & remote service, this course runs on the same day and if booked together will be discounted by £25.00

Accreditation

NCFE accredited level 2
Key & Remote Programming (MVPPRO/AD100PRO)

Course Details

Key & remote programming on modern vehicles can be a complicated procedure and requires both knowledge of keys and vehicle diagnostics. However, there are huge rewards available by offering this specialist service.

The AD100Pro / MVPPro users training course offers new and existing customers an ideal grounding in key and remote programming. In addition to understanding the equipment, the course includes details on immobilisers, pincode reading and tips and hints on vehicle specific requirements.

The training has a mixture of theory and practical with the opportunity to program a range of vehicles throughout the day. Whilst at Hickleys you will get the chance to meet the technical support team that will assist you in all technical aspects on an ongoing basis.

Course Content

- Introduction to immobilisers systems and how they work
- Transponder technology
- Vehicle security pincode systems
- Understanding your equipment
- Vehicle programming procedures
- Tips and hints
- Where to access reference info
- Additional equipment suggestions
- KeyDiy, OBD books
- Business development and marketing

Who should attend

The course is designed for beginners that have recently purchased an AD100Pro / MVPPro or have one within the business. The candidate will leave with the ability and confidence to program keys and remotes on a wide range of vehicles.

Accreditation

NCFE accredited level 2
Key & Remote Programming (SMARTPRO)

Duration : 1 Day (9am - 5pm)
Course Code : IIQ2034
NCFE level : 2
Price : £200.00 + VAT

Course Details

Key & remote programming on modern vehicles can be a complicated procedure and requires both knowledge of keys and vehicle diagnostics. However, there are huge rewards available by offering this specialist service.

The Smartpro users training course offers new and existing customers an ideal grounding in key and remote programming. In addition to understanding the equipment, the course includes details on immobilisers, pincode reading and tips and hints on vehicle specific requirements.

The training has a mixture of theory and practical with the opportunity to program a range of vehicles throughout the day. Whilst at Hickleys you will get the chance to meet the technical support team that will assist you in all technical aspects on an ongoing basis.

Course Content

- Introduction to immobilisers systems and how they work
- Transponder technology
- Vehicle security pincode systems
- Understanding your equipment
- Vehicle programming procedures
- Tips and hints
- Where to access reference info
- Additional equipment suggestions
- KeyDiy, OBD books

Who should attend

The course is designed for beginners that have recently purchased a Smartpro or have one within the business. The candidate will leave with the ability and confidence to program keys and remotes on a wide range of vehicles.

Accreditation

NCFE accredited level 2
Zed-FULL User Course

Duration : 2 Days (9am - 5pm)
Course Code : IIQ3074
NCFE level : 3
Price : £400.00 + VAT

Course Details

The Zed-FULL offers a single solution tool for the Auto Locksmith market. The combination of key cloning, remote cloning, transponder management, eeprom programming, pin code reading and OBD key & remote programming makes the Zed-FULL the most versatile programmer with flexible purchase options.

The Zed-FULL users training course offers new and existing customers an ideal understanding of all aspects of the tool, how to navigate the screens, use the software and benefit from the features.

The training has a mixture of theory and practical covering the full aspects of the Zed-FULL with the opportunity to work both on the bench and on a range of vehicles offering solutions to a selection of scenarios.

Course Content

- Introduction to immobiliser systems and components
- Introduction to the Zed-FULL system
- Understanding transponder technology
- Methods to identify, clone, produce, recycle, unlock and write transponders
- Testing, cloning and emulating remotes
- An understanding of eeproming solutions and the benefits
- Navigation of the Zed-FULL eeprom system
- Demonstration of pin code reading, transponder cloning and writing using eeproming.
- Reading pincodes, precoded transponders, programming keys and remotes via the OBD socket on a variety of vehicles.
- Overview of PC software, database, updating & loading software.

Who should attend

This two day course will give new owners of the Zed-FULL a comprehensive understanding of all the features of the equipment and how to maximise the various software options.

Accreditation

NCFE accredited level 3
Mercedes Key Programming

Course Details

The Mercedes key programming course requires understanding and practice and therefore we suggest that you attend this special one day training courses designed specifically to enable you to get the best from your equipment. The training offers a mix of theory and practical on a range of bench mounted demonstrations and includes OBD programming methods, direct connections and eepromming procedures.

Course Content

- Introduction to Mercedes remote key programming
- Understanding the hardware equipment
- Understanding the software
- Adding additional keys to a working system using the "sniff system"
- Adding keys using the OBD socket
- Ignition lock module removal and types
- Soldering techniques and methods
- Programming remotes to ignition lock modules
- Virginise used remote keys

Who should attend

The course is designed for customers that own a Zedfull and have purchased the Mercedes package.

The candidate will leave with the ability to program all types of Mercedes remote keys

Accreditation

NCFE accredited level 4
VAG Key Programming (VW, AUDI, SEAT, SKODA)

Course Details

Key programming on the VAG range of vehicles can be the most complex to understand due to the varying range of protocols used and the different programming methods adopted. Once you have a full understanding of the procedures, key and remote programming can be relatively straightforward.

Therefore, we suggest that you attend one of our special one day training courses designed specifically to enable you to understand the varying systems, maximise your programming abilities and get the best from your equipment.

VAG programming procedures include K line, Canbus, Precoded, UDS and the latest Smart key systems on Audi vehicles. The training offers a mix of theory and practical on the different protocols used. It takes a methodical path through the history of VAG key programming, starting with K Line then moving onto Canbus and covering Precoding transponders.

Once a full understanding of these systems are attained, the training will move onto the latest UDS dash programming and onto the latest Smart key programming used on Audi vehicles from 2010+.

This training takes the myth out of VAG programming and gives you the all the tools you require to maximise your programming opportunities

Course Content

- Introduction to VAG key programming protocols
- Systems installed by model and year
- Pincode reading methods and equipment used
- Understanding K Line systems, pincode reading, transponders and remote programming methods
- Understanding Canbus systems, pincode reading, transponders and remote programming methods
- Precoding transponders, differences in equipment, scanning systems and writing
- Understanding UDS systems, additional and lost key scenarios, pincode reading, dash removal, transponders and remote programming methods
- Understanding Smart key systems, additional and lost key scenarios, pin code reading, emulator keys and remote programming methods
- Understanding the hardware used in the various systems including, MVPPro, Smart Dongle, Smart Aerial, AD900Pro (Cyclone), Zed-FULL, Miracleone, Supervag and Vag Tacho
- Understanding the various transponders used and the precoding methods
- Using KeyDIY remote emulation for VAG vehicles

Who should attend

Anyone who uses Advanced Diagnostics (MVPPro / AD100PRO) and/or IEA (Zedfull) key programming equipment and wants to achieve a full understanding of VAG key & remote programming opportunities including the latest Audi Smart key system.

Accreditation

NCFE accredited level 4
Fiat Key Programming

Duration: 1 Day (9am - 5pm)
Course Code: IIQ3765
NCFE level: 4
Price: £250.00 + VAT

Course Details

Key programming on the Fiat range of vehicles gives huge opportunities for Autolocksmiths and key programmers, enabling them to offer an outstanding service and maximise their income.

The Fiat protocol uses a Precoded transponder, therefore ordering new keys and remotes from a dealer requires the key/remote to be ordered from Italy. This often takes 7 to 10 days and can cost up to £300 for a remote key.

The training covers pincode reading, transponder precode reading, remote emulating and key programming on the full range of Fiat vehicles, enabling you to create a fully working remote key without the need to order keys / remotes, and enabling you to complete the work immediately by the roadside.

Course Content

- Introduction to Fiat key & Remote programming
- Systems installed by model and year
- Pincode reading methods and equipment used
- Reading Precoding from the OBD socket, BCM or on some occasions via EEPROM
- Precoding transponders, differences in equipment methods and transponder writing
- Understanding the hardware equipment used in the various systems including, MVPPro, Smart Dongle, Smart Aerial, AD900pro (Cyclone), Zed-FULL
- Using Zedfull remote emulation for Fiat vehicles with 1, 2 or 3 buttons
- Methods and procedure for key & remote programming

Who should attend

Anyone who uses Advanced Diagnostics (MVPPRO / AD100PRO) and/or IEA (Zedfull) key programming equipment and wants to maximise their opportunities with Fiat key & remote programming.

Accreditation

NCFE accredited level 4

Eeprom and Microprocessor Programming

Course Details
EEPROM programming is an excellent extension to any auto locksmith’s services. The ability to be able to read a pincode or create a transponder directly from the immobiliser gives a profitable additional skill to the experienced auto locksmith.

An in-depth training course enabling students to carry out eeprom programming services. Includes eeprom / microprocessor removal, reading, writing and resoldering using a variety of equipment.

A training course with a high practical content and hands-on training.

Course Content
- Immobiliser systems - how they work
- Eeprom / Microprocessor systems and their operation
- Reading eeprom / microprocessors using Zed-FULL and other tools
- Writing eeprom / microprocessors using Zed-FULL and other tools
- Using Zed-FULL to create transponders and read pin codes
- Removal using hot air and refitting using soldering stations

Who should attend
Anyone wanting to expand their auto locksmith services into EEPROM programming, this highly skilled area offers the opportunity to expand your services and maximize your income.

Accreditation
NCFE accredited level 3
Advanced Eeprom Programming

Duration: 1 Day (9am - 5pm)
Course Code: IIQ2844
NCFE level: 4
Price: £250.00 + VAT

Course Details

The Advanced Eeprom course will give you excellent additional solutions to specific tasks, often giving a greater level of income. The course assumes you have a basic understanding and ability to carry out eeprom work, and the syllabus will enhance your abilities to an increased level.

The course concentrates on specific solutions for vehicles such as Toyota, BMW and Mercedes, plus a variety of separate solutions.

Course Content

- In-circuit reading solutions
- Pin Out solutions
- Toyota 4C and 4D eeprom methods and transponder start codes
- BMW EWS and CAS editing
- Mercedes Sprinter and Vito start errors
- Re-map files for immobiliser bypass, virginising and recoding
- Fiat ECU corruption
- VAG, UDS dash eepromming

Who should attend

It is mandatory that you have attended the ‘Eeprom and Microprocessor Programming’ course (2057) and have experience in eeprom work.

Accreditation

NCFE accredited level 4
Vehicle Opening Training

Course Details

An essential training course for anyone wanting to carry out non-destructive vehicle entry where all keys are lost.

Hickleys are the approved Lishi training centre, we offer professional manufacturer sponsored training. The course reviews "through the door" entry tools such as airbags, wedges and rods and their use.

The bulk of the tuition is practical lock picking using the Mr Li range of Laser and Tibbe picks.

Students will be taught the known procedures, systems and rules of opening various locks and instructed on the touch and feel required to best defeat the locks; once picked they can be decoded. Students will start on Tibbe, HU66, HU100, HU101, and then advance onto a variety of different locks depending on their speed of leaning.

Course Content

- Review of through door products
- Review of lock picks and decoders
- Practical demonstration on decoding Tibbe & Lazer locks
- Practical demonstration on picking Tibbe & Lazer locks
- Practical experience of decoding and picking using Tibbe & Mr Li Pick & Decoders
- Training review

Who should attend

Auto locksmiths, garage services, recovery companies and anyone that needs to gain entry into vehicles in a non-destructive method.

Accreditation

NCFE accredited level 2
Auto Key Impressioning

Duration: 1 Day (9am - 5pm)
Course Code: IIQ2038
NCFE level: 2
Price: £250.00 + VAT

Course Details

Key Impressioning is one of the most effective non destructive methods of vehicle entry. Often vehicles are equipped with a dead lock system which stops all other methods apart from defeating the lock. There are few lock designs that are able to resist this method of opening and being experienced in Impressioning gives you another option to open the vehicle.

One of the benefits of Impressioning a key is the limited tooling required, making Impressioning the most cost effective method of opening vehicles and creating keys.

This new training course has been developed in partnership with the world’s leading lock impressioner, Oliver Diederichsen. Oliver has passed on his years of experience and trained our trainer, Andy Marshall Brown. It is Oliver’s methods of training, tooling and training plan that this great course is based on.

Course Content

- Explanation of Impressioning different types of keys
- Explanation of tooling required
- Blank key perpetration and filing techniques
- Interpretation of marks and Impressioning methods
- Practical experience of cylinder and Tibbe keys
- The theory of Lazer key Impressioning

Who should attend

Auto locksmiths, garage services, recovery companies and anyone that needs to gain entry into vehicles in a non destructive method.

Accreditation

NCFE accredited level 2
F-Gas Accreditation - 1 Day

**Course Details**

The FGas regulations require you to have a refrigerant handling qualification by July 4th 2010. From the 4th July 2010, anyone working on vehicle air conditioning systems must have achieved a refrigerant handling qualification which meets EC regulation 307-2008, known as the "F-Gas Regulation".

Operators will require an IMI awards certificate; this will show employers and regulatory bodies that the holder has achieved a recognisable qualification. The qualification applies to all individuals who handle air conditioning refrigerant gases and may repair, recharge, service or in anyway dismantle an air conditioning system.

**One Qualification For Life**

With the DEFRA QCF qualification, your certificate lasts a lifetime.

Other styles of certification require renewal every 5 years, including ATA qualifications.

Successful candidates will receive a certificate from IMI Awards.

**Course Content**

- Practical test on gas handling
- Online test on refrigerant handling, legislation & servicing
- Review & certification award

Candidates should prepare for the assessment ensuring they have the required knowledge on AC systems, correct handling procedures, current regulations and health & safety requirements. Candidates can retake the exam a second time at no extra cost.

**Who should attend**

This course is for technicians that have previous knowledge and are reasonably competent in the service of air conditioning systems.

**Where and When**

The F-Gas accreditation can be taken at our Training Academy or on your site if the appropriate number of candidates are available (normally minimum of 4) and where acceptable facilities exist.

**Accreditation**

Successful candidates will receive a certificate from IMI Awards.
Air Conditioning Training inc F-Gas Accreditation - 1 Day

Course Details

The F-Gas regulations require you to have a refrigerant handling qualification by July 4th 2010. From the 4th July 2010, anyone working on vehicle air conditioning systems must have achieved a refrigerant handling qualification which meets EC regulation 307-2008, known as the “F-Gas Regulation”.

Operators will require an IMI awards certificate; this will show employers and regulatory bodies that the holder has achieved a recognisable qualification. The qualification applies to all individuals who handle air conditioning refrigerant gases and may repair, recharge, service or in anyway dismantle an air conditioning system.

One Qualification For Life
With the DEFRA QCF qualification, your certificate lasts a lifetime.

Other styles of certification require renewal every 5 years, including ATA qualifications.

Successful candidates will receive a certificate from IMI Awards.

Course Content

- Refresher training to cover legislation & procedures
- Practical test on gas handling
- Online test on refrigerant handling, legislation & servicing
- Review & certification award

Candidates should prepare for the assessment ensuring they have the required knowledge on AC systems, correct handling procedures, current regulations and health & safety requirements.

Who should attend

This course is for technicians that have previous knowledge and are reasonably competent in the service of air conditioning systems, but would like additional tuition and a refresher on legislation and procedures, in preparation of the F-Gas test.

Where and When

The F-Gas accreditation can be taken at our Training Academy or on your site if the appropriate number of candidates are available (normally minimum of 4) and where acceptable facilities exist.

Accreditation

Successful candidates will receive a certificate from IMI Awards.
Air Conditioning Training in F-Gas Accreditation - 2 Day

Duration: 2 Days (9am - 5pm)
Course Code: ACFGAS-2
NQF level: 3
Price: £400.00 + VAT

Course Details

The F-Gas regulations require you to have a refrigerant handling qualification by July 4th 2010. From the 4th July 2010, anyone working on vehicle air conditioning systems must have achieved a refrigerant handling qualification which meets EC regulation 307-2008, known as the “F-Gas Regulation”.

Operators will require an IMI awards certificate; this will show employers and regulatory bodies that the holder has achieved a recognisable qualification. The qualification applies to all individuals who handle air conditioning refrigerant gases and may repair, recharge, service or in anyway dismantle an air conditioning system.

One Qualification For Life
With the DEFRA QCF qualification, your certificate lasts a lifetime.

Other styles of certification require renewal every 5 years, including ATA qualifications.

Successful candidates will receive a certificate from IMI Awards.

Course Content

- Comprehensive training to cover:
  - Air con system operation
  - Testing procedure
  - Refrigerant handling
  - Current legislation
  - Health & safety
  - Practical test on gas handling
  - Online test on refrigerant handling, legislation & servicing
  - Review & certification award

Candidates should endeavour to get a basic understanding of air conditioning systems and legislation prior to attending the training.

Who should attend

This course is for technicians who have limited or no air conditioning knowledge, require update training or have recently invested in air conditioning equipment.

Where and When

The F-Gas accreditation can be taken at our Training Academy or on your site if the appropriate number of candidates are available (normally minimum of 4) and where acceptable facilities exist.

Accreditation

Successful candidates will receive a certificate from IMI Awards.
Places to Stay
A selection of Hotels, Pubs, Inns or B&B’s for you to select from whilst attending your course.

**Corner House Hotel**
Park Street, Taunton, Somerset, TA1 4DQ
Tel: 01823 284683 Email: res@corner-house.co.uk

Terms & Conditions for all Training Courses

1. All terms will be subject to English Law.

2. A non-refundable deposit will be taken upon booking & balance must be paid in full at least one month prior to any training taking place. If booking is made within the month of training payment must be in full.

3. Cancellations;
   “Hickleys Ltd” reserve the right to cancel or alter dates of any course within 2 weeks of training taking place. If there are students booked onto these courses they will be offered an alternative date or a full refund.

4. We will endeavour to offer alternative dates if a student cannot attend a booked course through circumstances beyond their control, any medical problems or bereavements. Where we cannot offer an alternative date any payments received other than the deposit will be refunded.

5. “Hickleys Ltd” reserve the right to refuse a student entry to any training if payment hasnt been made.

6. All students will abide by any “Fire, Health & Safety” in place at the course location. Fire, Health & Safety will take preference over all aspects of all courses.

7. All students will be expected to behave in a manner befitting the course, behave so as not to be disruptive to other students, refrain from being under the influence of alcohol or drugs and not behave in a criminal manner.

8. Any information made on all booking forms will be treated in confidence.
# Training Course Dates

The following dates for available training dates is correct at time of printing.

For a full, up to date list of all current training dates available, please visit our dedicated training website at www.hickleystrainingacademy.com.

If you require any further information on any of the courses, please don’t hesitate to call us on 01823 328604.

Where no dates are advertised please register your interest and we will organise a course when sufficient numbers achieved.
I would like to thank you and your team for the outstanding training and help that I needed to set up and start my own business.

After completing my Colour Service with the British Army, and doing 25 years service, I have found it a lot easier to do with the help and support that has been given by yourself.

As you know I have used other companies to dot he Auto Locksmith training. I have found the package that you use is one of the best. Also, I would like to thank Andy Marshall-Brown's way of teaching. He is able to talk the walk, but able to do the walk, so lead's by example. He teaches about the trade but also the dos and don'ts needed within it to get along, which I would say is not the normal with other training providers.

Due to this, I have been asked by other members of the army force about the courses I have done. I have told them about which companies and courses I have used and done, and told them to use Hickleys.

I would also like to thank the team that kitted out my van to a very high standard. I have sent the photos of the setup and completion of the van onto Facebook and tagged in Hickleys.

Once again, thank you for all the help.

John Williams | Open Door Auto Ltd

The course used a combination of theoretical and practical work and assessments effectively to best aid learning. I felt that I absorbed the course content quickly due to the high standards of teaching from the instructor - Andy Marshall-Brown. A great course which I believe has given me the knowledge to move forward in my career.

Thank you.

Mr Craig Edward Smith (Army)

This was a well structured, informative and fulfilling course. The instructor was fantastic and we covered all aspects of Auto Locksmithing. We did on occasions have to stay late - however this only enhanced the learning and ensured that the whole course left with the skills required to work in the public arena.

Well done Hickleys!

Chief Petty Officer Stuart Malcolm Thompson (RN)

I would just like to say a big thankyou! Having only recently become self employed I found it to be quite a big decision to invest in the 10 day autolocksmith training course. After speaking with Nicky and Robin I felt suitably reassured that Hickleys were best placed to provide the training I needed, due to the vast level of expertise in the autolocksmith industry possessed by them.

I found the course itself to be extremely well structured and also to be set out at a good pace. Not too fast, not too slow. The training was given by master locksmith Andy Marshall, his wealth of knowledge was fantastic and his ability to pass it on in an easy to absorb manner really helped. I found the course so good that I actually didn’t want it to end…

Although the course itself was fantastic and worth the cost alone, an extra addition not to be overlooked is the ongoing support from the tech team at Hickleys provided for all candidates who complete the course. This is worth its weight in gold. The experts in the Hickleys diagnostic and key programming department are amazing….

This 10 day course exceeded my expectations and I look forward to my next course at Hickleys.

Once again thankyou…

Liam Collington
